### Reconfigurable

Can be easily and quickly be reconfigured to meet changing needs within your organization. Reconfigure a single drawer through to the whole frame.

### Multiple Applications

The security, flexibility and functionality make the machine ideal for a multitude of industries and applications from industrial and office through to medical use.

### Different Drawer Sizes

A wide range of drawer sizes are available to accommodate a wide range of item packages and management methodologies at optimized cost.

### Accountability

The unique SupplyPoint software suite provides a complete audit trail on who, when, where and why about the usage of any component managed by the 28 LEVEL machine.

Combined with our powerful SupplyPoint Inventory Management Software, the 28 LEVEL provides a versatile high capacity solution, to meet the unpredictable challenges of modern logistics and supply chain management.

## RECONFIGURABLE

The 28 LEVEL can be easily and quickly reconfigured to meet the changing requirements of the user. Single trays or the entire frame can be easily changed in minutes without the use of tools.

## UNIQUE MANUAL OVERRIDE

In an ideal world a manual override would never be needed, but if required the 28 LEVEL ensures 24/7 availability with a unique manual override capability which is simple and easy to use and requires no disassembly.

## SECURITY

Access to the contents of the 28 LEVEL can be restricted by the use of username, password, biometric identification, card readers or a combination of these options. The drawers locks are of a high strength and cannot be forced open in normal or aggressive use without the assistance of tools. The items held within the 28 LEVEL are hidden from view and can be randomly distributed around the machine, reducing the risk of the unauthorized removal of contents.

## COMPATIBILITY

The 28 LEVEL can be seamlessly integrated into any existing SupplyPoint™ installation.

## EXPANDABILITY

The 28 LEVEL can be expanded up to 10 units per systems to provide up to 1121 secure locations managed and controlled by the powerful management software designed and developed SupplyPoint™ Systems experienced Engineers.

## ACCOUNTABILITY AND TRACEABILITY

All transactions are logged to a specific user and cost center with full and accurate audit and reporting capabilities detailing who, when, where and why about the usage of any component managed by the systems.

## HIGH SPEED ACCESS

Rapid search and selection of items via the SupplyPoint™ software is further enhanced with a complete LED identification systems, which guides users directly to the drawer.

## DIAGNOSTICS

The machine has a built in tray diagnostic port, facilitating improved remote systems support, diagnosis and repair.

## EFFICIENCY

Multiple drawers can be selected in a single transaction, minimizing the time required to manage large volumes of stock.
