

## LockerFlex™

- ▶ Flexible compartment heights
- ▶ Tool-less quick release shelf
- ▶ Manage larger items
- ▶ Illuminated compartments

LockerFlex™ is designed to allow for the combination of several small compartments into a larger one - suiting variable product heights and sizes.

The horizontal shelves can quickly be removed and put back in without the use of any tools, allowing for a very easy (re)configuration.

LockerFlex™ can be adapted precisely to your needs and item portfolio at any point in time!

### Product Details

CONSTRUCTION	Steel and acrylic windows
HEIGHT	Max vertical column height (internal) 168cm / 66 inches
COLORS	Blue
POWER	230V AC, 3A

All SupplyPoint Solutions offer:

- SupplyPoint software
- 24/7 availability
- Reduced product consumption
- Improved productivity
- Lower inventory costs
- Optimised inventory
- Convenience and simplicity

### Standalone or Add-On

Can be used as a standalone solution or included as part of a larger SupplyPoint™ installation.

### Locker Options

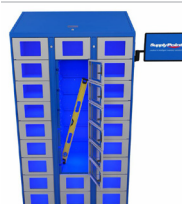

Small and medium size locker compartments are available with removable shelving to create larger compartments

### Specification

Weight per shelf

Max weight of 100kg per column with a divider approach. Heavier items can conveniently be placed in the lowest compartment, at the bottom of the locker.

Combined with our powerful SupplyPoint inventory management software, the LockerFlex™ compliments our extensive product range to efficiently control an even greater range of your essential inventory.

## EXPANDABLE AND VERSATILE

LockerFlex™ can be reconfigured with a mixture of different size lockers to provide between 3 and 27 secure locations in a single frame. Up to 10 frames can be connected providing up to 270 secure locations in a single system.

## MANUAL OVERRIDE

In an ideal world a manual over-ride would never be needed. But if required, it ensures 24/7 availability to all the contents with a quick and easy manual override capability allowing access to items stored within.

## EFFICIENCY

Multiple locations can be selected in one transaction minimizing the time required to withdraw several items.

## COMPATIBILITY

LockerFlex™ is fully compatible with all existing SupplyPoint™ machines.

## SECURITY

Access to the contents in the locker is restricted by the use of: username, password, biometric identification, card readers or a combination of these options. The door locks are of a high strength and cannot be forced open in normal or aggressive use without the assistance of tools.

## TRACEABILITY

The powerful SupplyPoint software provides a complete audit trail allowing management to know who, what, where and why about the usage of system managed items.

## INDIVIDUAL LOCKER LIGHT

Each individual locker compartment has it's own lighting capability, allowing full visibility of products within the locker cabinet.

## Locker Size

Total Height (Including lid)	Height (without LID)	Width	Depth
203cm	180cm	109.3cm	50cm

## Smallest Compartment Dimension

Door Size	Small	Medium
Height (mm)	154	254
Width (mm)	300 (inc hinge)*	300 (inc hinge)*
Depth (mm)	480	480

370mm full capacity, 260mm inc lock - all dependent on item being placed inside the locker.

## Locker Configuration

Locker Type	Configuration
S2	Base configuration: total of 18 medium compartments, 6 per vertical column*
S3	Base configuration: total of 27 small compartment, 9 per vertical column*

\* Compartments can be combined vertically, within each stack.

## Example configurations
