

# ECTC

The Electronically Controlled Tool Cabinet marries SupplyPoint's access control to an existing tool cabinet, providing an entry-level product suitable for multiple purposes.

## Product Overview

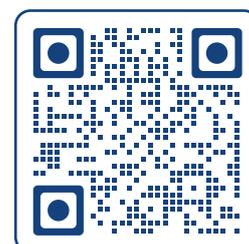

Whether you're controlling items for a cell or for a tool crib, ECTC offers drawer-level security capable of managing both large and small items.

Multiple frame heights and three drawer types that can be subdivided into as many as 48 easily-reconfigured compartments per drawer offer a flexible solution for your inventory management needs.

Compartment-level control can be attained through the installation of up to 36 LIDs within one or more ECTC drawers, making it a perfect solution for automotive or medical applications.

Using the VendTel User Interface, the ECTC Vending Machine can stand alone, join with other ECTC units, or join in installations mixed in with other SupplyPoint Vending Machines to serve your inventory control needs.
